

STRUCTURE MODELLING: Learn to model structural elements like Foundations, Columns, Beams and Slabs in Revit.

ARCHITECTURE MODELLING: Learn to model Walls, Doors, Windows, Curtain Glazing, Roofs, Ceilings, Finish Floors etc. in Revit.

INTERIOR MODELLING: Learn to model Furniture, Ceiling Designs, Flooring Patterns etc. in Revit

MEPF MODELLING: Learn to model Mechanical, Electrical and Plumbing Components in the scope of Architects/Civil Engineers in Revit.

LANDSCAPE AND SITE MODELLING: Learn to model Contours, Hardscaping, Softscaping. Place Vegetation and site components.

ARCHITECTURAL DRAWINGS: Master in Presentation Drawings and Construction Drawings. Learn to create Submission Drawings, Tender Drawings and GFCs in Revit.

ESTIMATES AND BOQs: Automatically Calculate quantities of elements with Costing in Revit

ENERGY ANALYSIS: Excel in Passive Design Measures by quick energy simulations of Solar, Shadow and Illumination Analysis

NAVISWORKS: Know how to do Project based Automatic Clash Detection

DYNAMO: Learn the Basics of Visual Programming with Dynamo for Revit

BIM360/ACC: Collaborate and Coordinate Seamlessly on Cloud with Revit Worksharing
